

The Backshop Flyer, Train 1306, *Fresh from the Backshop and Ready For Service...*

This is a combined edition of our Newsletters that includes an exceptional list of new products, pre-orders and a couple of new DCC tips.

Spring has passed and the first day of Summer is upon us. I missed the May edition as I had my head down and iron hot. When I looked up, bam... Summer hit me square in the face.

This is a special Father's Day edition where I salute all of the Fathers and Grand Fathers who are on board. The days are long and hard but we do it for them in spite of it all. I encourage you to invite your kids and grand kind into the train room and share a moment of our wonderful hobby with anyone you can today. It's our day... Let's share our passion for this great hobby and run a train!

While you're at it, be sure to check out all of our great products for model railroaders and treat yourself to new train today!

Special Announcement... ***We will not be shipping orders from June 27, 2013 to July 8, 2013...***

WOW! As many of you know, this is still a home-based business. After seven years and as many agents, we (think we) have finally sold our home. Assuming all of paperwork gets done promptly, there are no additional date changes, and there are no more surprises lurking in all of the new regulations, we are anticipating a move at the end of the month. I have no doubt it will be a challenge but we are only moving about three miles so it is a modest task by all rights. The biggest challenge with this move will be getting a workshop for SBS4DCC set up and functional. This will be my highest priority to ensure minimal delay on all of the projects I have committed to. To that end, I have made significant progress on my backlog and cleared out a considerable amount of work. Most of the projects that are left are N scale diesels with sound which are also delayed for other reasons. More on that in a moment.

To add to this challenge, we had already planned a mini-vacation for the 4th of July weekend so I will be mostly unavailable from July 3 to July 7 since the location is very remote and connectivity will be limited. I must admit that I am truly looking forward to a little break.

No worries. Just another day in the life of...

My new contact info will be:

Bryan Vianco
Streamlined Backshop
7229 Euliss Court
Avon, IN 46123
317-201-4974

I will work on updating the website and other references after everything is finalized.

The store will remain open during this time so feel free to shop and place orders. Please understand that I will not be able to ship as quickly as normal.

As always, thank you for your support, your patronage, and your patience as we move forward!

High Ball... *All greens to SBS4DCC.com.*

In the news this month...

Soundtraxx has obsoleted the [826601 TSU-4664N decoder](#) made specifically for the N Scale Athearn 4-6-6-4 Challengers. They have indicated they might consider another run if there is enough interest in the product. I will continue to take order for this so if anyone is interested please let me know.

Blackstone has announced that the new run of [C-19 2-8-0's](#) and first pieces of the [HOn3 ProTraxx Snap-Track System](#) are now shipping.

Here is a demo of the new TCS WOW-Sound decoders. I still don't have confirmed information about the specs but they have revised the models. TCS will not provide any additional info of the actual ship date except that it will be soon. We are still accepting pre-orders for the [TCS WOW-Sound decoders](#) until then...

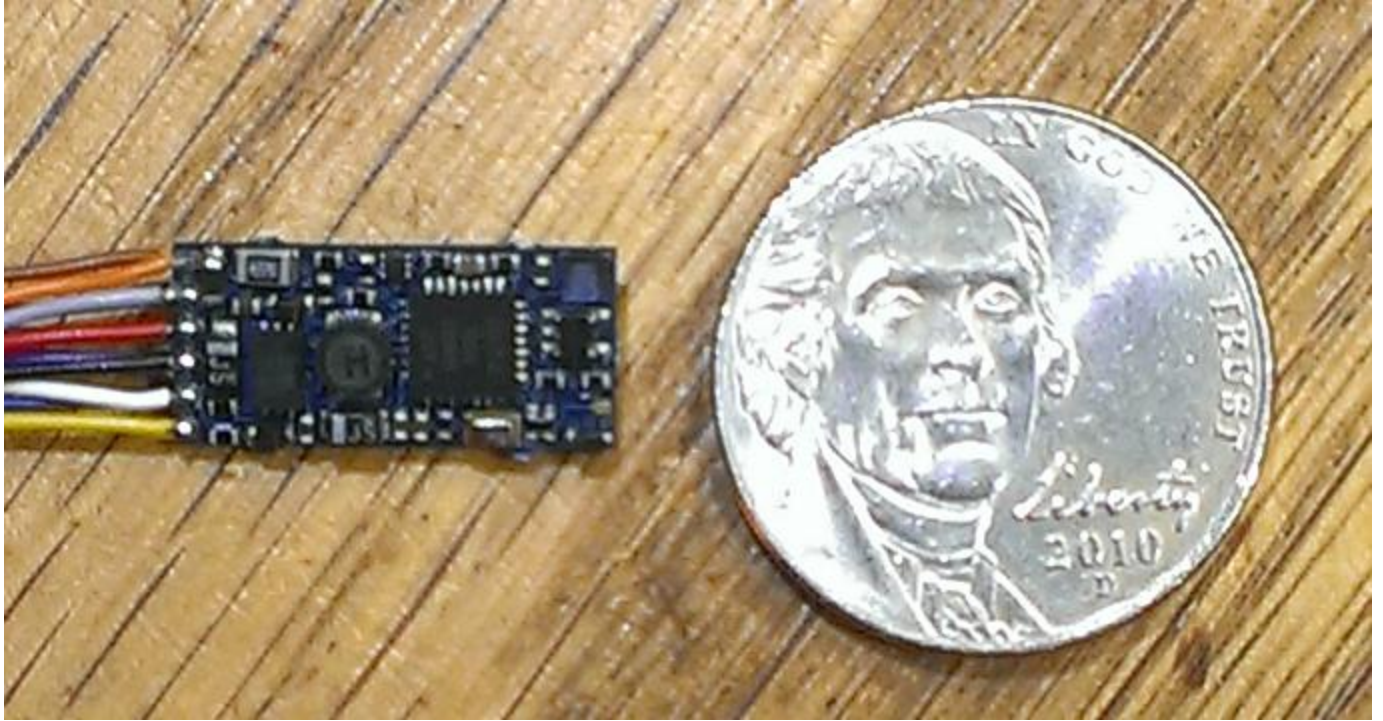

Looks pretty keen...

We continue to add products from the [CT Electroniks](#) catalog. Although it can be a challenging to work with, the diminutive size makes it a very compelling product. Imagine a sound decoder small enough to fit in a Z scale narrow hood diesel...

New this month are the [DCX33 Function Decoder](#), the [SL76 Sound Decoder](#), and the CT SoundProg decoder programmer.

The [DCX33 Function Decoder](#) is a great choice for projects where size matters. Continuing on the CT theme, this function decoder measures 0.41 x 0.26 x 0.055 Inch (10.4 x 6.7 x 1.4 mm) while still offering four amplified functions. It also has four unamplified functions that could be made useable with the [SBS4DCC Aux 3-4 Logic Level Function Amplifier Board](#), but it's not nearly as small as the decoder!

The [SL76 Sound Decoder](#) shatters the size barrier, includes a CT "Sugar Cube" Speaker, and my sample sounds fantastic. It is less than have the size of a LokSound Micro and even smaller than the Sub-Micro Zimo MX648.

As always, it does come with many caviats...

First is that CT has a limited selection of sound files. Currently, the OEM files are largely based on Austrian prototypes. I can only offer Steam Diesel or Electric at this time and cannot reference them to a specific prototype. I will work on that but it is a big hill to climb...

Second is that loading sound files is not easy-button easy. I have partnered with John Gymer, owner of YouChoos.com, to offer his [CT SoundProg Software](#) which greatly simplifies this task. I will also stock the CT SoundProg decoder programmer complete with an appropriate 120V US-type power supply which is the required hardware for loading the files. Make no mistake, creating a useable decoder sound file will still be a monumental task but the software is a key component. Of course you can always get a package directly from John if you prefer.

Third, is that documentation is a bit sparse so we have to try to muddle through some topics. John has documented his product very well and has provided a translation of the [SL76 manual](#) to aid in this journey.

So... having said all of that, if you can accept the shortcomings, just look at its size! That's some good stuff right there...

ESU has announced many [great new products](#) for 2013. Some highlights include:

[ESU 54620 LokPilot FX V4.0 Multi-protocol \(MM/DCC/SX\) Decoder 8 Pin](#)

[ESU 54640 LokPilot V4.0 XL NMRA DCC plus MM/SX/M4 Decoder Screw Terminal](#)

[ESU 54680 RailCom Transmitter Unit \(5pk\)](#)

We will make these products available as quickly as we can.

News from the Backshop...

New product lines added recently include:

We are proud to announce that SBS4DCC is now a [Team Digital](#) authorized dealer. The Team Digital line allows us to offer stand-alone DCC compatible signaling and automation solutions.

The [Peco Track](#) catalog in several scales including N, HO, HOn3, O, On30 and G. These are still catalog items but I will work on adding stock for quick shipping as quickly as I can.

The [Woodland Scenics](#) catalog. I will be adding stock on this line as quickly as I can.

Now Arriving, Track 1...

[SBS4DCC - Stock Status Information](#)

Just a reminder that SBS4DCC.com for real-time inventory tracking. If it says it is in stock... it IS... I try to maintain a strong selection of DCC and Model Railroad products and try not to hide what I do not stock yet. I appreciate the opportunity to provide catalog items when you can wait a few

extra days as this make a huge difference in my ability to grow and expand my selection.

Our latest shipment of Zimo stock is on the way and includes a MXULFA as well as 8x12 and 11x15 Cube speakers. We had a big run on the cubes in May the depleted our stock. Thanks for the many orders. The cubes get my vote for product of the year. I hope you agree. Keep an eye out for a few new sizes too!

Now Boarding... Pre-Orders for May and June.

Be sure to take advantage of our no-obligation Pre-Order Special featuring \$1 domestic shipping. No deposit is required and payment is not due until the units are in stock.

[HOn3 Blackstone Frameless Tank Car](#)

Backshop DCC Tip Of The Month...

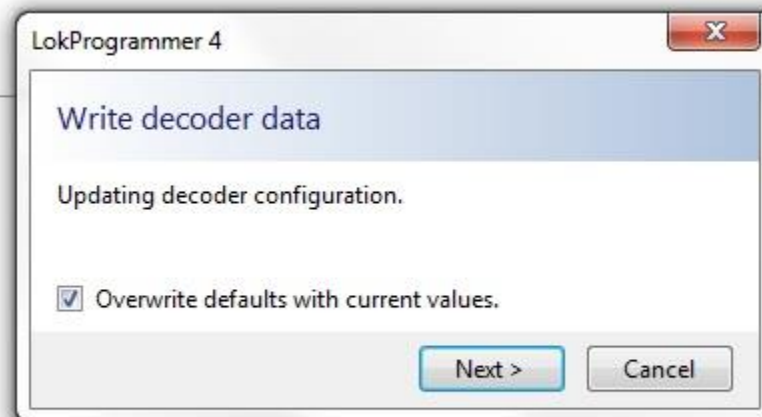

I am taking a mulligan again this month on the "How To" series. I will get back on that once I settled in and running in Notch 8 once again. This month is going to be another "drop-in" type tip...

Writing sound files to a ESU LokSound decoder is a two-step process.

The first step, Write Sound Data , writes the sound file and CV data to the decoder. It is important to note that this only writes the data to current memory.

The second step, Write Decoder Data , overwrites the default CV data with the current CV data. This is important because these are the values that are restored if you have to do a decoder reset (CV8=8).

SBS4DCC Varnish Lighting...

I continue to receive lots of positive feedback regarding the [Z, N and HO Scale Passenger Car Lighting Boards](#). I hope you will give them a try on your next car lighting project.

Also be sure to check the [Z, N and HO Scale Passenger Car Lighting Additional Board Connection Diagrams](#) and [Z, N and HO Scale Passenger Car Lighting Additional Application Notes](#) pages for additional information.
